

std::optional< T >

```
graph BT; A[kblib::delayed_construct< T >] --> B[std::optional< T >]
```

The diagram illustrates a relationship between two C++ types. At the bottom, a grey rectangular box contains the text `kblib::delayed_construct< T >`. A green arrow points vertically upwards from the center of this box to the center of a white rectangular box above it. The white box contains the text `std::optional< T >`. This visualizes that `kblib::delayed_construct< T >` inherits from or is a specialization of `std::optional< T >`.
