

std::true\_type

```
graph BT; A[KBLIB_NS::exists< T >] --> B[std::true_type];
```

A diagram illustrating a relationship between two C++ types. At the bottom is a gray rectangular box containing the text `KBLIB_NS::exists< T >`. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box contains the text `std::true_type`. This indicates that `KBLIB_NS::exists< T >` inherits from or is a specialization of `std::true_type`.

KBLIB\_NS::exists< T >
