

std::true\_type

```
graph BT; A[kblib::is_aliasing_type< unsigned char >] --> B[std::true_type]
```

A diagram illustrating a relationship between two C++ type traits. At the bottom is a gray rectangular box containing the text `kblib::is_aliasing_type< unsigned char >`. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box contains the text `std::true_type`. This indicates that `kblib::is_aliasing_type< unsigned char >` inherits from or is a specialization of `std::true_type`.

kblib::is\_aliasing  
\_type< unsigned char >
