

std::false_type

```
graph BT; A["Catch::always_false< T >"] --> B["std::false_type"]; A --> B;
```

The diagram illustrates the relationship between two C++ types. At the top is a white rectangular box containing the text 'std::false_type'. At the bottom is a gray rectangular box containing the text 'Catch::always_false< T >'. Two blue arrows originate from the top edge of the gray box and point upwards towards the bottom edge of the white box, indicating that 'Catch::always_false< T >' inherits from 'std::false_type'.

Catch::always_false< T >
